

MOOG

Important Moog ICD Policy Notification

TO: Distributor Repair Specialist

DATE: June 12, 1998

Moog ICD Distribution Policy Number:	DN011A
Effective:	February 8, 2006
Supersedes Policy Number:	DN011
Policy Name:	Repairs Waiting Authorization

Moog retains the right to return **ALL** products that are sent to Moog for repair that we do not receive authorization to repair within 30 days after we quote the repair price. These products will be returned to the distributor.

An inspection fee of \$250.00 list price will be charged (subject to distributor discount) for these returned products for the initial inspection service that has been performed.

Please note: **The \$250.00 list inspection fee may be waived for products where repair authorization is received prior to 30 days after quote. (See policy DN0015B for other criteria for having the fee waived).**

This policy is intended to reduce the "on-hold" status of valves in the repair department, the administrative costs associated with calling for repair approvals and provide more timely repairs to pre-authorizes repair requirements.
